Welcome to street artists and groups with your unique passion and way of expressing your own creativity

Frivolus is a festival of street artists and street art, where professional artists and groups who operate outside the commercial theatres and circus, shows their performances on the street.

Under the auspices of the Municipality of Koper the festival will take place in the city of Koper, Slovenia from 31.8 to 2. September 2018. The three day cultural arts festival will honor magicians, jugglers, acrobats, illusionists, actors, musicians and other street artists who will revive the squares, streets and promenades. The program is totally free and it's open for everybody, from the youngest to the oldest.

The purpose of the festival is to spread the culture of street art and bringing it closer to our daily lives. We want to bring in Koper a new spirit, a new energy, a new wave of people who will fascinate the city and locals. We will support local and foreign artists and give them an opportunity to present themselves in their own form of expression. The festival will revive Koper and present it as a modern city, which develops and supports modern street artists.
